

Osama Boumelhem

Game Designer: UI/UX, Systems & Mechanic Design

Enschede, NL | +31 6 39 76 51 84 | oboumelhem@gmail.com | Portfolio: [oboumelhem.github.io](https://github.com/oboumelhem) | linkedin.com/in/osama-boumelhem-442846257

SKILLS

Design: UI/UX Design, Wireframing & Prototyping, Interaction Design, Game & Mechanic Design, Systems Design, Level Design, User Research & Usability Testing, Playtesting & Iteration, Behavioral Design Theory, Narrative Design

Tools: Figma, Rive, Unity, C#, HTML/CSS/JS, Adobe Suite (Premiere Pro, Substance Painter), Cursor (AI-assisted prototyping)

Process: Agile/Scrum, Trello, Discord, Client & Stakeholder Communication, Competitor Analysis

EDUCATION

Creative Media and Game Technologies, Game Design & UI/UX focus – Saxion University of Applied Sciences 08.2023 – Present | Enschede, NL

Relevant modules: Game Development, Immersive Storytelling, Advanced Web, UI/UX Advanced

BSc Computer Science – University of Southern California 08.2017 – 12.2018 | Los Angeles, USA

SELECTED PROJECTS

Empyrean Arena – Solo, Systems Design & UI/UX, TTRPG

- Designed a complete dice-and-card resolution system from scratch for a 1v1 tabletop combat game, refining it across three full playtest cycles with real players using a Double Diamond process.
- Solo-designed the full manual and card system in Figma end to end, researching existing TTRPG manuals to build a unified “fighting game” visual identity (custom palette, typography, modular stylesheets), then extended that language into a companion app prototype.

ASPCA Ethical Breeding App – Behavioral Design, Solo

- Applied behavioral design frameworks (Hook Model, Fogg Behavior Model, NUDGE strategies) to design an ethical-breeding awareness app.
- Validated two prototype iterations with peer feedback grids and an 8-respondent survey, moving the design from lo-fi to hi-fi.

Royal Racers – UI/UX Advanced, Solo

- Designed and built a hi-fi Figma prototype for a competitive racing sim, creating custom UI components from scratch based on competitor research into the racing and mobile multiplayer genres.
- Ran two rounds of A/B testing to iterate the interface across Version A, Version B, and final release, backed by a documented UI stylesheet.

Bugaboo Planet – Game, Level & UI/UX Design, Project Manager, Team of 7, Real Client

- Served as Project Manager on an 8-week client project for Saxion's MONSTeR initiative, leading client outreach and communication with the Enschede public library and a local school, daily stand-ups, and timeline planning.
- Designed minigame mechanics, levels, and UI for two competitive kiosk games built around children's original monster drawings, then validated the MVP through in-person playtesting with the client's target age group.

Animask – Lead Designer, Global Game Jam 2026

- Designed all 15 playable levels as Lead Designer for a 72-hour jam entry themed “Mask,” structuring difficulty progression from dedicated teaching levels into full puzzle challenges.
- Recognized as one of the top games at the jam. Published and playable on itch.io.

Hands Off My Hoard – Mechanic & UI/UX Design, Team of 6

- Designed the core mechanic loop for a gyroscope- and voice-controlled mobile game, built in a 3-week sprint, and led design iteration through playtesting.
- Owned all in-game UI as the project's main design contribution, designing and iterating the HUD, menus, and roguelite upgrade cards into a documented UI stylesheet.

AWARDS & RECOGNITION

- Animask (Global Game Jam 2026): recognized as one of the top games at the jam; published on itch.io.
- Bugaboo Planet: publicly exhibited at Bibliotheek Enschede-Haaksbergen as part of Saxion's MONSTeR project.

PRACTICAL EXPERIENCE

Design Intern – Tidalflow AI

04.2025 – 08.2025 | Amsterdam, NL (Remote)

- **Design Audit & Recommendations:** Conducted a full design audit of a wellness app, identifying usability gaps and presenting improvement recommendations directly to the product team.
- **Onboarding Flow Design:** Led competitor analysis across four leading health and wellness apps to design a new onboarding flow, the internship's primary deliverable.
- **Prototyping & Gamification Research:** Produced app update prototypes and explored gamification concepts in Figma and Rive to support user engagement goals.

Founder & Admissions Consultant – UniAid

10.2019 – 03.2021 | Casablanca, MA

- Designed international university application strategies and built custom process content for clients, alongside IELTS/TOEFL tutoring.

Market Research & E-commerce Intern – Ezyaa

03.2019 – 06.2019 | Casablanca, MA

- Performed competitor and market-trend research on regional e-commerce apps to inform product and launch strategy.

Logistics & Operations Intern – Home Over Import-Export

06.2019 – 09.2019 | Casablanca, MA

- Coordinated overseas merchandise import procedures and processed B2B/B2C order documentation.

LANGUAGES

English & Arabic (bilingual), French (intermediate), Dutch (beginner)

HOBBIES & INTERESTS

Reading, climbing (bouldering), cooking, and TTRPGs & worldbuilding.
